

Assignment 6

```
1) #include <stdio.h>

void Pattern (int iNo)
{
    if (iNo < 0)
    {
        iNo = -iNo;
    }

    for (int iCnt = 1; iCnt <= iNo; iCnt++)
    {
        printf("%d * ", iCnt);
    }
    printf("\n");
}

int main()
{
    int iValue = 0;
    printf("Enter number: \n");
    scanf("%d", &iValue);

    Pattern(iValue);

    return 0;
}
```

2] #include <stdio.h>

```
void display (int iNo)  
{
```

```
    int iCnt = 0;
```

```
    for (iCnt = 1; iCnt <= iNo; iCnt++)  
    {
```

```
        printf ("%d ", iCnt);  
    }
```

```
    printf ("%d ", iCnt);  
    printf ("\n");
```

```
}
```

```
int main()  
{
```

```
    int iValue = 0;
```

```
    printf ("Enter number: \n");  
    scanf ("%d", &iValue);
```

```
    display (iValue);
```

```
    return 0;
```

```
}
```

3]

```
#include <stdio.h>
```

```
void display(int iNo)
```

```
{
```

```
    int iCnt = 0;
```

```
    for (iCnt = 1; iCnt <= iNo; iCnt++)
```

```
    {
```

```
        printf("%d\t", iCnt);
```

```
    }
```

```
    printf("\n");
```

```
}
```

```
int main()
```

```
{
```

```
    int iValue = 0;
```

```
    printf("Enter number: \n");
```

```
    scanf("%d", &iValue);
```

```
    display(iValue);
```

```
    return 0;
```

```
}
```

4] #include <stdio.h>

void oddDisplay (int iNo)

{

int iCnt = 0;

for (iCnt = 1; iCnt <= iNo; iCnt++)

{

if ((iCnt % 2) != 0)

{

printf("%d ", iCnt);

}

}

printf("\n");

}

int main()

{

int iValue = 0;

printf("Enter number: ");

scanf("%d", &iValue);

oddDisplay(iValue);

return 0;

}

5] #include <stdio.h>

```
void MulDisplay(int iNo)
```

```
{
```

```
    int iCnt = 0;
```

```
    for (iCnt = 1; iCnt <= 5; iCnt++)
```

```
    {
```

```
        printf("%d ", iNo * iCnt);
```

```
    }
```

```
    printf("\n");
```

```
}
```

```
int main()
```

```
{
```

```
    int iVal = 0;
```

```
    printf("Enter number: \n");
```

```
    scanf("%d", &iVal);
```

```
    MulDisplay(iVal);
```

```
    return 0;
```

```
}
```
